WaCRM Client User Manual & Quick-Start Guide

How to Manage Chats, Contacts, Pipelines, Campaigns & Subscription Renewals

DOCUMENT OVERVIEW

This official document provides operational guidelines, configuration steps, and best practices for the WaCRM platform.

1. Welcome to Your WhatsApp CRM Workspace

WaCRM is an all-in-one customer relationship and messaging platform built specifically for WhatsApp Business. It empowers your team to collaborate on customer chats, manage sales funnels, launch broadcast campaigns, and automate follow-ups.

- **Shared Multi-User Inbox:** Allows your entire sales and support team to chat with customers simultaneously from one WhatsApp Business number.
- **Contact & Audience Management:** Store customer profiles, custom notes, purchase history, and multi-colored tags for quick segmentation.

2. Managing WhatsApp Chats in the Shared Inbox

- **Conversations List:** Access /inbox to view open, pending, and resolved customer threads with real-time unread badges.
- **Rich Media Support:** Send and receive text, voice notes, PDFs, documents, images, and videos directly through the WhatsApp Business API.
- **Quick Replies (Canned Responses):** Type "/" in the chat composer to pull up pre-written template replies for FAQs, pricing details, and bank info.
- **Customer Info Sidebar:** The right pane displays contact tags, deals, and assignees without leaving the conversation.

3. Sales Pipelines & Visual Kanban Board

- **Kanban Stages:** Navigate to /pipelines to track prospects from Lead -> Qualified -> Proposal Sent -> Won / Closed.
- **Drag & Drop Deals:** Move deals seamlessly across stages with automated revenue and deal-value calculations per stage.
- **Direct Chat Access:** Click any deal card to instantly jump to the customer’s WhatsApp conversation thread.

4. Broadcast Marketing Campaigns

- **Meta-Approved Templates:** Send official WhatsApp broadcast messages to hundreds of opted-in customers using approved Meta templates.

- **Targeted Audiences:** Filter recipients by specific tags (e.g. VIP, Inactive, Follow-Up) to send relevant promotions.
- **Live Campaign Analytics:** Monitor real-time Delivery Rate, Read Rate, and Failure counts for every broadcast sent.

5. No-Code Automations & AI Smart Auto-Reply

- **Welcome Auto-Replies:** Automatically send a welcome message whenever a new customer reaches out to your WhatsApp number.
- **Keyword Triggers:** Configure automated actions (tagging, sending catalogs) when incoming messages contain specific keywords.
- **AI Assistant:** Enable the AI Auto-Responder under Settings -> AI to answer inquiries 24/7 using your custom business knowledge base.

6. Subscription Renewal & Payment Instructions

Your WaCRM workspace operates on a monthly subscription fee. The platform ensures you never lose access by providing timely notifications:

- **WhatsApp Renewal Reminders:** You will receive payment reminders directly on your WhatsApp number 3 days and 1 day prior to expiration.
- **In-App Warning Banner:** A banner appears in your dashboard header when your plan is due for renewal, showing the exact expiry date and fee.
- **How to Pay:** Click the "Pay Renewal Now" button on your dashboard or in the WhatsApp reminder to complete payment via the secure payment link (UPI, Stripe, or Card).
- **Payment Confirmation & Activation:** Once paid, your validity is instantly updated by the Super Admin. If you need assistance, click the "WhatsApp Admin" button to connect directly with support.
